

Serious Mental Illness (SMI) CRITERIA CHECKLIST

SMI determination is based on the age of the individual, functional impairment, duration of the disorder and the diagnosis. Adults must meet all of the following four criteria:

- 1. **Age:** Must be an adult 18 years of age or older.
- 2. **Diagnoses:** Have one of the diagnoses specified in the list below as defined under the current *American Psychiatric Association Diagnostic and Statistical Manual of Mental Disorders*. The diagnosis would need to have been determined within the prior 12 months by an appropriately credentialed and licensed professional.
- 3. **Functional Impairment:** The disturbance is excessive and causes clinically significant distress or impairment in social, occupational, or other important areas of functioning.
- 4. **Duration:** Expected duration of the disorder is to be six months or longer.

List of Diagnoses for #2 Above
