# Benchmark Relativity Charts Overview

The Phase 1 and Phase 2 Provider Rate Benchmarking Study Reports include charts that display NM FFS Rates in relation to the selected benchmark rates. Those charts show NM FFS Rates as the numerator, resulting in a relativity percentage above 100% for all instances where NM FFS Rates are higher than the benchmark rate.

This presentation includes a snapshot of the same benchmarking data, but displaying the inverse relativities between NM FFS Rates and the selected benchmarks. These charts display relativity percentages below 100% for all instances where NM FFS Rates are higher than the benchmark rate. Presenting these charts in this inversed format may be beneficial in interpreting the results.

The Provider Rate Benchmarking Study Reports provide detailed descriptions of the data sources, methodologies, and limitations associated with the charts included in this presentation.

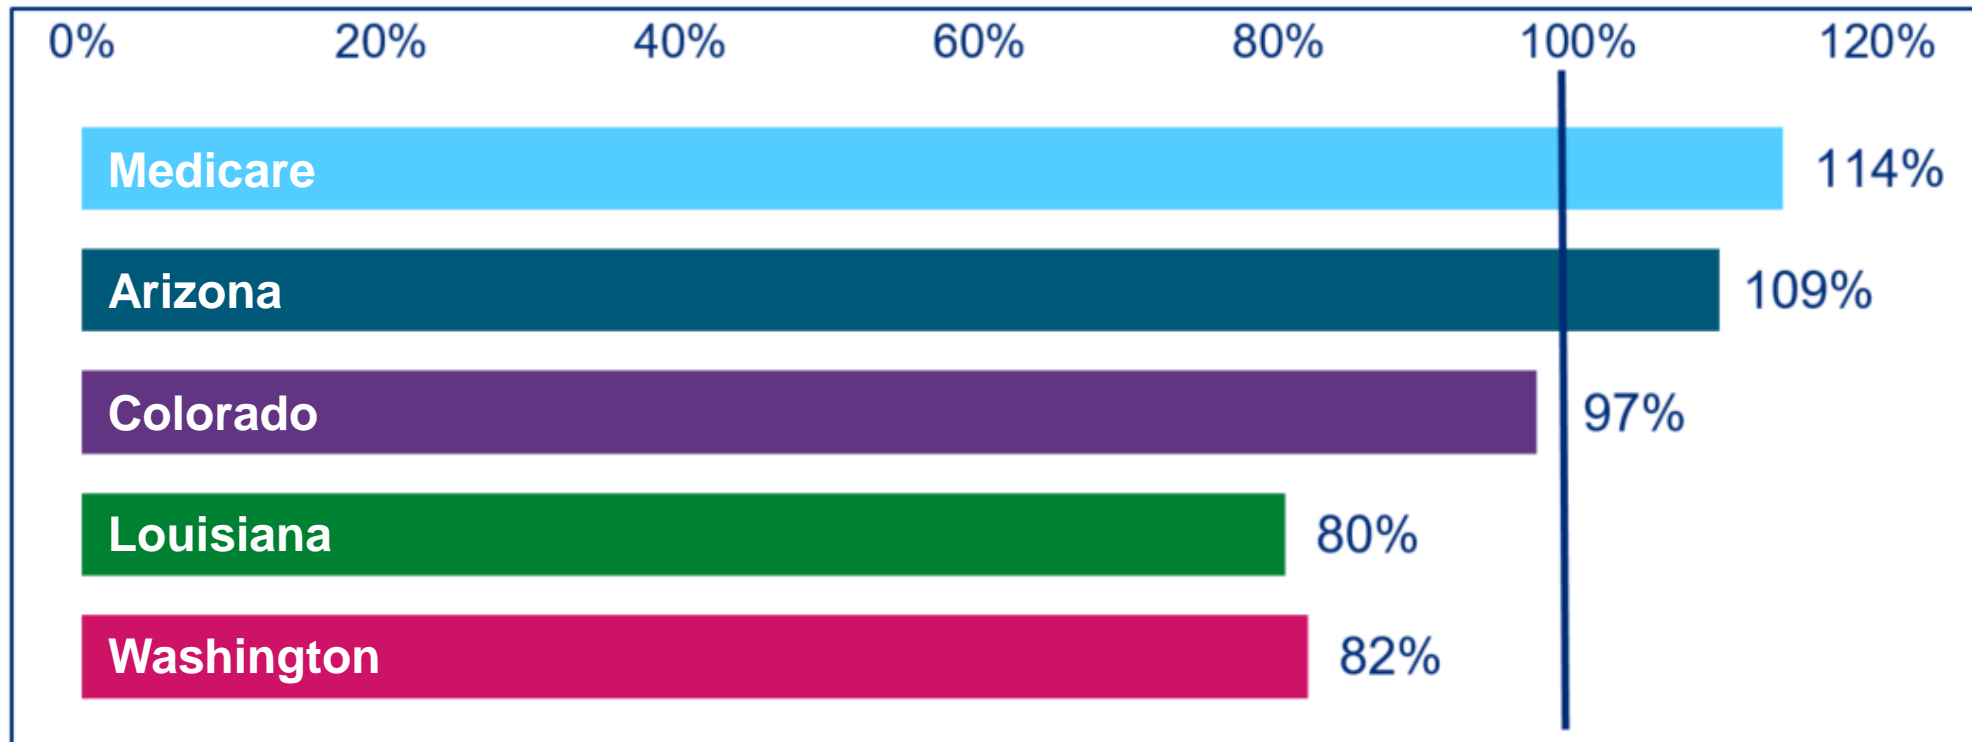

*Relativity charts for HCBS, FQHC/RHC, Hospice, Residential Treatment Centers and Other Institutional service areas have not been included in the Benchmarking Reports or in this presentation.*

Benchmark Relativity = [Medicare FFS Rate] / [New Mexico FFS Rate]

1. For nursing facilities, Mercer compared the NM Medicaid FFS payments to the estimated facility costs (based on facility costs reported in Medicare cost reports).
